Income Tax - Electronic Return Inquiry

How can I find out if the Department of Revenue received my electronically filed income tax return?

If your return requested a refund, you may verify receipt of an electronically filed return as well as inquire about the status of your refund by visiting our Automated Account Information Services Program, 24-hours a day, seven days a week throughout the income tax season. You must have your refund amount for this year or last year available to use this system. Your refund information will be available 7-10 days after filing.

Federal/State Filing: If you filed through the federal/state system either through a tax preparer or an online tax service, you can contact the preparer or the tax service to verify receipt of the return.

NetFile: If you filed through NetFile, after submitting the return you should have received the message:

"Confirmation Successful – Your filing has been successfully submitted on: DAY OF WEEK – DATE – TIME has been received successfully..."

[Where DAY OF WEEK – DATE – TIME shows the day, date, and time the filling was originally submitted.]

You should print that page from NetFile and retain it with your tax records. This will serve as confirmation that the return was filed and received by the Department of Revenue.

TeleFile: If you filed through TeleFile, you received a confirmation number after completing the return. This confirmation number is your verification that the return was filed and received by the Department of Revenue.
